As you can see, Procreate has a lot of options to choose from. However, it also offers general canvas information and a customizable Drawing Guide, which is especially useful for Calligraphy/Lettering works. Here they are: From left to right: DownstrokeUnder turn strokeOverturn strokeOvertu While the names might sound a bit lame, The beautiful thing about these 7 strokes is the fact that you can create nearly any letter of the lowercase alphabet in a short period: Straight letters - i,l,t,fBranching letters - n,m,h,b,p,k,r Reverse Branching letters - u,y,a,d,g,qOval letters - o,c,eDiagonal letters - s,v,w,x,z And most importantly. You'll be able to practice so much more efficiently! One more tip... Aw, Looking back now, I really wish I would have learned about this sooner. But oh well, here we are. Seriously, If I could make it this far without these tips and tricks, YOU most certainly can as well, especially with the help of this tutorial. That being said, There is still one more tip I would advise you to implement during practice: Use GUIDELINES. This will be useful for two key things: Once you move away from the basics, you'll soon find yourself in a bunch of letters just waiting to step outside their boundaries. Guidelines are going to prevent that from happening: Spacing + Consistency = BAD Spacing + Consistency = BAD Spacing + Consistency = GOOD See? Well, yes, technically. Brush Library A singer has a microphone. A new guide will be released on the first Thursday of every month for the next few months, so keep an eye out if you enjoy them! For those, I would highly recommend watching the video linked below to get a better understanding. 4. But when done right, there is a chance to get noticed by the growing iPad Lettering community. And by the looks of it, there is a chance to get noticed by the growing iPad Lettering community. at specific settings, I would like to take a brief moment to talk about Modern Calligraphy. This is by far the easiest and most fun style to learn in the beginning. Why? Because by definition, Modern Calligraphy does not follow traditional structural rules... ... which is perfect for people like me a few years ago who just wanted to start writing pretty stuff as fast as possible. Another reason why it is so important to talk about Modern Calligraphy is the fact that this is the style most commonly associated with the term iPad Lettering. Palette Library Procreate's Palette Library Found a color scheme you like? Here are two examples I've found that are useful: Using multiply - Import Calligraphy with white background Select Multiply blend mode Et voilà - Begin your journey Layer Opacity This one's pretty straight forward: Drag the slider to adjust the opacity of the selected layer. Pro tip: Setting it to around 40-50% is perfect for worksheets! 5. It's still important to practice without a visual reference too of course, but you can work up to it building muscle memory and forming good habits in letter slant and stroke weights. However, this can be modified by selecting one of Procreate's Blend modes or merely changing the layer opacity. Requirements You need the iPad Pro, Apple pencil (or another pressure sensitive stylus) and the Procreate App. Though a bit time-consuming, the results are not going to disappoint. If you're interested, definitely check out this article and video (also by yours truly) Psst - The resource above also includes a FREE iPad Lettering Brush* Another solution is to simply download the Brushes from artists who are already experienced, Brush makers. Great for changing the overall mood. Saturation of the layers below and hue of the layers below, and hue of the layers below, and hue of the layers below. luminosity of the selected layer. The Color category essentially cycles through hue, saturation, and luminosity of the top/bottom layers. In short, There are a TON of ways to utilize blend modes. Whether writing something for yourself or a client, your choice of hue will MASSIVELY determine how it is perceived by the public eye! Oh and if you're interested in learning more about this topic, Here are two resources I found very useful: 6. Thin upstrokes require less/no pressure; THIN UPSTROKES/THICK DOWNSTROKES Repeat those strokes as many times as you can until you get used to the movement and develop a sense of the amount of pressure applied in each stroke. Contrast Con downstrokes. It CAN, however, drastically reduce the amount of frustration you get. Trust me, trying to do Calligraphy with a pre-installed Charcoal Brush is simply another tool that helps you create better art. It contains eight words you can trace over and then try for yourself (both with a visual reference and without). This resource is intended to help you apply the techniques you learned in the premium Copperplate course. You'll do yourself a disservice and most likely get frustrated and give up.
